

This map displays the United States with various aviation categories and flight levels. The categories are color-coded: VFR (green), MVFR (blue), IFR (red), and LIFR (pink). The flight levels are labeled with numbers: 13000, 11000, 9000, 7000, 5000, 3000, 1000, 500, 300, 200, 100, 50, 30, 20, 10, 5, 3, 2, 1, 0. The map shows a complex distribution of these categories and levels across the country, with a significant concentration of LIFR and IFR areas in the eastern half, particularly in the Northeast and Southeast. The western half of the country is predominantly VFR, with some MVFR areas in the mountain regions. The flight levels are generally higher in the west and lower in the east, reflecting the terrain and the density of flight operations.
